

9.1P: In Person Check-in 3 – Answer Sheet

1. What was the most challenging aspect of the case study tasks? Why?
 - The most challenging aspect was designing UML and sequence diagrams because they require a thorough understanding of the system's structure and interactions, which can be complex and intricate.
2. What is the most valuable thing you have learned in this unit so far?
 - The most valuable learning has been understanding design patterns, as they provide reusable solutions to common problems and improve the overall structure and maintainability of the code.
3. What are some strategies for success you can start or continue using for the remainder of the semester and in future units?
 - Continuously solving problems on LeetCode to enhance problem-solving skills.
 - Seeking feedback to identify areas of improvement and refine techniques.
 - Deepening understanding of key concepts to build a strong foundation in the subject matter.
